Edgepark

* Edgepark's insurance verification is never a guarantee of coverage. It is the customer's responsibility to verify eligibility and coverage with their insurance plan. Not all insurance plans provide coverage for breast pump purchases. The customer's insurance plan may have guidelines on whether the covered pump is manual or electric, the length of the rental, and when they'll receive it. Edgepark provides double electric breast pump for purchases only. No manual or rentals are available through Edgepark.

† The Elvie Stride is only available through select insurance plans.

‡ The Spectra 9 Plus and S1 Plus are only available through select insurance plans.

§ The Zomee Fit is only available through select insurance plans.

1

We have nearly a century of experience.

Edgepark opened in 1928 as a small corner pharmacy in Ohio. Since then, we have grown to become an industry leader in home delivery of insurance covered products, including electric, hospital strength and portable breast pumps. For over 90 years, we have been committed to delivering caring and quality service to mothers all over the country.

2

We offer some of the most popular and wearable breast pump brands available through insurance.*

- Ameda
- Ardo
- BabyBuddha
- Elvie†
- Evenflo
- Freemie
- Lansinoh
- Medela
- Motif Medical
- Rumble Tuff
- Spectra‡
- Zomee§

3

Select the pump that's right for you.

Once a customer indicates their insurance plan, they will be able to see the breast pumps they qualify for. The coverage and patient out-of-pocket costs will vary between health insurance carriers and plans.*

4

We keep the process simple.

Once a customer picks the pump that's right for them and places their order, we take care of the rest. Edgepark verifies their insurance, contacts their doctor for a prescription, and ships it right to their doorstep for free.

5

We have the expertise to take orders anytime.

An expecting mother can order her pump at any time during her pregnancy. Based on her insurance requirements, we'll ship her pump right away or hold it until she is eligible.
