

Maintenance Medication List

2025 Updated
3/7/25

The prescription medications on this list are considered maintenance medications. Maintenance medications are medications that are commonly taken to treat chronic medical conditions, most often requiring daily use. These include medications used to treat different chronic health conditions such as high blood pressure, high cholesterol, diabetes and asthma. In order to be covered by SmartHealth, maintenance medications will be required to be filled at an Ascension Rx Pharmacy. This list does not guarantee coverage and is subject to change. Drug coverage information can be found using the SmartHealth Drug Search Tool (ascensionsmarthealth.maxorplus.com/formulary).

SmartHealth members can receive up to three fills of their maintenance medications at a non-Ascension Rx pharmacy that are covered by their pharmacy benefit before being required to fill maintenance medications at Ascension Rx in order to be covered. 90-days supplies are available at Ascension Rx Home Delivery with a discounted copay.
